

My Pocket - Terms of Service & Privacy Policy

Last Updated: October 30, 2025

Welcome to My Pocket! We're happy you're here. This is a simple tool designed to help you save notes and links right in your browser. To ensure you have a clear understanding of how it works, we've outlined our terms and privacy approach below.

Terms of Service

1. **Our Agreement** By using the My Pocket application ("the Service"), you're agreeing to these terms. We've tried to keep them straightforward so you know exactly what to expect.
2. **A Simple, "As-Is" Tool** My Pocket is a free tool provided for your convenience. To keep it simple and accessible, we offer it on an "as is" and "as available" basis. This means we don't make any specific promises or warranties about its features or reliability. We hope it works perfectly for you, but we provide it without any guarantees.
3. **Understanding Our Liability** Because this is a free, client-side tool, it's important to understand that we are not liable for any damages or losses that might arise from using it. This includes things like the loss of data or any inconvenience caused by the service not being available. We are providing this tool in good faith, and using it is your choice.
4. **You Are in Control of Your Data** You are in complete control of the content you save in My Pocket. Because your data is stored locally on your device (more on that below), the responsibility for what you save and for keeping it safe (for example, by making backups) rests with you.
5. **Evolving Terms** We may update these terms from time to time. If we do, your continued use of My Pocket will mean you accept the changes. We'll always keep this page updated with the latest version.

Our Commitment to Your Privacy

1. **Your Privacy is Our Priority** My Pocket is built from the ground up to be private. We do not have servers that collect, view, or store your notes. Everything you save in the application is stored exclusively in your web browser's localStorage on your own computer or device. We have no access to it.
2. **An Important Note on Data Safety** Since your data lives only in your browser's storage, it is tied to that specific browser and device. This means actions like clearing your browser's

cache or site data will permanently delete your My Pocket items. We don't have a copy, so we cannot help you recover them. Please be mindful of this and consider using the 'Export to JSON' feature to make backups.

3. **Third-Party Resources** To make the application look and feel great, we use some resources hosted by third parties, like Google Fonts and Font Awesome. These services help deliver the app's design but do not have access to your saved data. They may have their own privacy policies regarding their operations.
4. **Questions?** If you have any questions, the best way to reach us is through the official atikle help center: <https://atikle.github.io/help/contact/form>

Thank you for using My Pocket. We hope you find it useful!
